

Guidance for CITES Scientific Authorities

Checklist to assist in making non-detriment findings for Appendix II exports

Compiled by
A. Rosser and M. Haywood

Donors to the SSC Conservation Communications Programme and Guidance for CITES Scientific Authorities: Checklist to assist in making non-detriment findings for Appendix II exports

The IUCN Species Survival Commission is committed to communicate important species conservation information to natural resource managers, decision-makers and others whose actions affect the conservation of biodiversity. The SSC's Action Plans, Occasional Papers, newsletter (*Species*), and other publications are supported by a wide variety of generous donors including:

The Sultanate of Oman established the Peter Scott IUCN/SSC Action Plan Fund in 1990. The Fund supports Action Plan development and implementation. To date, more than 80 grants have been made from the Fund to SSC Specialist Groups. The SSC is grateful to the Sultanate of Oman for its confidence in and support for species conservation worldwide.

The Council of Agriculture (COA), Taiwan has awarded major grants to the SSC's Wildlife Trade Programme and Conservation Communications Programme. This support has enabled SSC to continue its valuable technical advisory service to the Parties to CITES as well as to the larger global conservation community. Among other responsibilities, the COA is in charge of matters concerning the designation and management of nature reserves, conservation of wildlife and their habitats, conservation of natural landscapes, coordination of law enforcement efforts, as well as promotion of conservation education, research and international cooperation.

The World Wide Fund for Nature (WWF) provides significant annual operating support to the SSC. WWF's contribution supports the SSC's minimal infrastructure and helps ensure that the voluntary network and publications programme are adequately supported. WWF aims to conserve nature and ecological processes by: (1) preserving genetic, species, and ecosystem diversity; (2) ensuring that the use of renewable natural resources is sustainable both now and in the longer term; and (3) promoting actions to reduce pollution and the wasteful exploitation and consumption of resources and energy. WWF is one of the world's largest independent conservation organizations with a network of National Organizations and Associates around the world and over 5.2 million regular supporters. WWF continues to be known as World Wildlife Fund in Canada and in the United States of America.

The US Fish and Wildlife Service (USFWS) through its office of International Affairs was responsible for working with the Department of State to support, through the US voluntary contribution to IUCN, the workshops which led to development of the guidance for CITES Scientific Authorities in making non-detriment findings. The FWS is the lead U.S. federal agency in the conservation of the nation's migratory birds, threatened and endangered species, certain marine mammals and sport fishes. It also serves as the lead federal agency concerning international conventions on wildlife and operates a program of public affairs and education to enhance the public's understanding and appreciation of America's fish and wildlife resources.

The Secretariat of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) has supported the development of this work on the non-detriment finding.

Acknowledgements

We are particularly grateful to the Council of Agriculture, Taiwan; the US State Department voluntary contribution to IUCN and the CITES Trust Fund for support to develop assistance on the making of CITES non-detriment findings. The work was initiated in Hong Kong, at a workshop that brought together wildlife managers, biologists, and government officers in an attempt to look at the practical challenges and requirements for making such findings. A checklist system proposed at the initial workshop was refined and then tested extensively at a second workshop, held in Cambridge. This second workshop was hosted by the CITES Secretariat, organized by IUCN and generously funded from the CITES Trust Fund and through the voluntary contribution to IUCN from the US State Department. Workshop participants included the Vice Chair of the Plants Committee, the Chair and Vice Chair of the Animals Committee, regional representation from the Plants and Animals Committees and representatives from individual Parties.

Throughout the process vital support has been provided by Ling-Ling Lee of the Species Survival Commission; Mr Fang of the Council of Agriculture, Taiwan; Sue Lieberman of the US Fish and Wildlife Service; Ger van Vliet and Malan Lindeque of the CITES Secretariat; to all these we extend a huge vote of thanks. WWF Hong Kong generously assisted with logistic support for the first workshop.

However, the development of this work would not have been possible without the contributions of the participants in the two workshops who laid the foundations for the development and testing of the checklist. Grateful thanks are extended to the following: Mohammad Ahmedullah, SSC Indian Plant Specialist Group; Bertrand von Arx, Vice-Chair CITES Plants Committee, Canada; Tony Bigwood, CITES Scientific Authority, Australia; Ashish Bodasing, TRAFFIC East/Southern Africa; Richard Bodmer, University of Florida, USA; Edson Chidziya, CITES Animals Committee, Zimbabwe; Corazon Catibog Sinha, SSC Steering Committee, Australia; Kou-Yung Fang, Swan International, Taiwan; Vin Fleming, CITES Scientific Authority, UK; Daniel Gagnon, University of Quebec, Canada; Mandy Haywood, IUCN/SSC Wildlife Trade Programme, UK; Marinus Hoogmoed, CITES Animals Committee, Netherlands; Jon Hutton, Africa Resources Trust, UK; Manit Jaichagun, CITES Scientific Authority, Thailand; Hank Jenkins, Chair, CITES Animals Committee; Jia Jianseng, Scientific Authority,

China; Bowssidjaou Ezzo Joseph, CITES Scientific Authority, Togo; Jan de Koenig, CITES Plants Committee, Netherlands; Frank Lambert, BirdLife, Indonesia; Susan Lieberman, CITES Animals Committee, USA; Malan Lindeque, CITES Scientific Authority, Namibia, later CITES Secretariat; Steve Nash, TRAFFIC International; Noel McGough, CITES Scientific Authority, UK; Sue Mainka, Deputy Co-ordinator, IUCN/SSC, Switzerland; Harald Martins, CITES Scientific Authority, Germany; Tom de Meulenaer, Director, TRAFFIC Europe, Belgium; David Morgan, European Commission, Belgium; Flavio Moschione, CITES Scientific Authority, Argentina; Teresa Mulliken, TRAFFIC International, UK; Jean Ngog Nje, CITES Scientific Authority, Cameroon; Bernardo Ortiz von Halle, IUCN SUR, Ecuador; Neriman Ozhatay, CITES Scientific Authority, Turkey; Marcus Phipps, TRAFFIC East Asia, Hong Kong; Siti Nuramaliati Prijono, CITES Scientific Authority, Indonesia; Moh Rejdali, CITES Plants Committee, Morocco; Alison Rosser, IUCN/SSC Wildlife Trade Programme, UK; Tim Sullivan, Brookfield Zoo & Chicago Zoological Society, USA; Peter Paul van Dijk, Chulalongkorn University, Thailand; Ger van Vliet, CITES Secretariat; Lillian Villalba, CITES Scientific Authority, Bolivia; Nigel Leader-Williams, Durrell Institute for Conservation and Ecology, UK; Guo Yin Feng, CITES Scientific Authority, China; Hsiao Wei Yuan, SWAN International, Taiwan; Mr Chan, CITES Management Authority, Hong Kong.

Particular thanks are due to a number of individuals who have made further contributions to the process, and without them, little progress would have been possible. Tim Sullivan facilitated the first workshop in Hong Kong. Jon Hutton and Nigel Leader-Williams developed the draft checklist from suggestions made at the first workshop. Participants to the second workshop brought comments to refine the initial checklist and species examples with which to test the checklist. After the second workshop, the final checklist was re-drafted and tested by plant experts: Bertrand Von Arx, Jan de Koenig, Noel McGough, and Ger van Vliet, and by animal experts: Jon Hutton, Nigel Leader-Williams, and Malan Lindeque with input from Sue Lieberman. Mandar Trivedi has assisted with preparations for publication of this volume.

We are very grateful to all these organizations and individuals for their contributions.
